**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Priority***

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on 7/4/02. It is noted, however, that applicant has not filed a certified copy of the DE 102 30 058.5 application as required by 35 U.S.C. 119(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 15-24 are rejected under 35 U.S.C. § 103 as being unpatentable over either Olsen or Morita et al in view of Schorr et al. Olsen discloses a reciprocating piston machine comprising a housing cover (17) screw connected to a housing (10) enclosing the pistons; wherein a shaft bearing (24, 25) is in the cover and the screw connection is in a ring nut (14); but does not disclose that the screw thread is a saw tooth thread.

Morita et al discloses a reciprocating piston machine comprising a housing cover (6) screw connected to a housing (1), by threads in the housing and cover; wherein the housing encompasses the pistons (2); wherein a shaft bearing (8) is in the cover and the screw connection is in a ring nut; but does not disclose that the screw thread is a saw tooth thread.

Schorr et al teaches, for a piston machine comprising a housing cover (48) screw connected to a housing (10); that the screw thread is a saw tooth thread, for the purpose of having a greater thread bearing depth (column 3 line 58-column 4 line 2).

Art Unit: 3745

Since Olsen and Morita et al have a housing cover screw connected to a housing, but does not disclose what type of threads are used; and Schorr et al teaches a specific purpose for saw tooth threads; it would have been obvious at the time the invention was made to one having ordinary skill in the art to make the threads of either Olsen or Morita et al saw tooth threads, as taught by Schorr et al, for the purpose of having a greater thread bearing depth

***Conclusion***

Claims 25-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
